

New Hampshire Baby Diaper Facts

Compiled by the National Diaper Bank Network

Diapers are as essential to a baby's healthy development as a mother's love. Keeping infants and toddlers clean, dry, and healthy is key to building a solid foundation for all children to reach their full potential. But many babies don't have the clean diapers they need.

New Hampshire's Babies Need Strong Foundations

Children in low-income families are at greatest risk of suffering the effects of diaper need because many families can't afford diapers. Current public support programs help some, but young children have additional needs necessary to build a strong foundation for healthy growth and to reach their fullest potential.

Mothers in the workforce with infants

Most working parents rely on child care. Most child care facilities require parents to provide diapers for their child. Without child care, parents can't work or attend school.

TANF & Diapers in New Hampshire

An average monthly supply of diapers costs approximately \$80. The only federal assistance program that can be used for diapers is TANF, but TANF has to cover many other expenses, including heat, electric and water bills, rent, clothing, transportation, and other basic needs. Little if any money is available to purchase enough diapers to keep a baby clean, dry, and healthy.

New Hampshire Needs Diaper Banks to Fill the Gap

New Hampshire has

2

NDBN-member diaper banks that distribute

24,486

diapers annually.

The National Diaper Bank Network's goal is to ensure that every child in the United States has enough diapers to remain clean, dry, and healthy. Diaper banks across the country are working to eliminate diaper need by providing families with diapers.

Nationally there are **300+** NDBN-member diaper banks distributing over

52 million diapers annually!

All diaper banks require community support and donations of diapers and dollars to allow them to serve their communities.
